THE AUTHOR

Linda G. Robbins is a home economist with the Food Markets Analysis Division, Policy Branch, Agriculture Canada, in Ottawa. She works in the area of food consumption and expenditure and nutrition in the Demand and Price Analysis Section.

L'AUTEUR

Linda G. Robbins est une économiste domestique avec la division de l'analyse des marchés agro-alimentaires, direction générale des politiques, Agriculture Canada, à Ottawa. Elle travaille dans les domaines de la consommation et de la nutrition à la sous-section de l'analyse de la demande et des prix.

FOREWORD

Research workers in the field of demand and price analysis spend considerable time and effort assembling data from diverse sources and ensuring that the data are comparable among series, and over time. This publication was prepared to meet the need for a comprehensive and convenient source of data used in analyzing food consumption patterns in Canada.

This handbook presents historical data on the population of Canada, personal income, personal expenditure on consumer goods and services, retail food prices, and supply and disposition balance sheets for a number of food commodities. In addition, selected tables from family expenditure surveys, the United States, the world and the OECD have been included.

This publication will be updated periodically; therefore, comments on its usefulness and suggestions for revision are welcome.

H. Migie
Director
Food Markets Analysis Division

AVANT-PROPOS

Dans le domaine de l'analyse de la demande et des prix à la consommation, les chercheurs doivent consacrer beaucoup de temps et déployer des efforts considérables pour rassembler les données de diverses sources et s'assurer qu'elles sont comparable parmi les séries et par rapport au temps. Par conséquent, cette publication a été préparée pour répondre au besoin d'une source complète et commode de données utilisées dans l'analyse des structures de la consommation alimentaire au Canada.

Ce guide présente les données historiques sur la population du Canada, le revenu et les dépenses personnels pour les biens et les services offerts au consommateur, le prix au détail des aliments, ainsi que le bilan d'un certain nombre de denrées. En outre, on a inclu divers tableaux tirés des enquêtes sur les dépenses des familles; lesdites enquêtes ont été réalisées aux Etats-Unis, dans le monde et dans les pays membres de l'OCDE.

Cette publication sera mise à jour régulièrement. Vos commentaires et vos suggestions seront appréciés.

H. Migie
Directeur
Division de l'analyse des marchés
agro-alimentaires

ACKNOWLEDGEMENT

The author wishes to express her gratitude to those who assisted in the preparation of this handbook: J. Legge, D. Conway, D. Orchard, L. Paquette, L. Laniel, B. Wootton, S. Lafave, J. Bélanger, T. Bow, A. Trempe, U. Comeau and G. Thompson.

INDEX OF TABLES

Page

INTRODUCTION

I. Population

1. Estimated Population of Canada by Province, June 1, 1947-1985 21
2. Projected Population for Canada and Provinces, June 1, 1986-2006 22

II. Income and Food Expenditures

3. Gross Domestic Product at Market Prices, 1961-1985 27
4. Provincial Gross Domestic Product at Market Prices, 1961-1984 28
5. Personal Expenditures on Consumer Goods and Services, 1961-1985 29
6. Personal Expenditures on Durable, Semi-Durable and Non-Durable Goods and Services, 1961-1985 30
7. Provincial Personal Expenditure on Consumer Goods and Services, 1961-1984 31
8. Personal Income, Personal Disposable Income and Personal Savings, 1961-1985 32
9. Personal Income, Geographical Distribution, 1947-1984 33
10. Personal Disposable Income, Geographical Distribution, 1947-1984 34
11. Personal Consumption Expenditures for Food and Non-alcoholic Beverages, 1961-1985 35
12. Food Expenditures as a Percentage of Disposable Income and Personal Expenditures on Consumer Goods and Services, 1961-1985 36
13. Personal Expenditures on Durable, Semi-Durable and Non-Durable Goods and Services as a Percentage of Personal Disposable Income and Total Expenditures on Goods and Services, 1961-1985 37
14. Implicit Price Indexes, 1961-1985 38

III. Family Expenditures

15. Weekly Food Expenditure by Family Income Quintile Group, All Fourteen Cities, All Families and Unattached Individuals, 1969 41
16. Weekly Food Expenditure by Family Income Quintile Group, All Fourteen Cities, All Families and Unattached Individuals, 1974 43
17. Weekly Food Expenditure by Family Income Quintile Group, All Eight Cities, All Families and Unattached Individuals, 1976 45
18. Weekly Food Expenditure by Family Income Quintile Group, All Sixteen Cities, All Families and Unattached Individuals, 1978 47
19. Weekly Food Expenditure by Family Income Quintile Group, All Sixteen Cities, All Families and Unattached Individuals, 1982 49
20. Weekly Food Expenditure by Family Income Quintile Group, All Seventeen Cities, All Families and Unattached Individuals, 1984 51

IV. Retail Food Indexes

21. Consumer Price Indexes – Major Items, 1949-1985 55
22. Retail Food Price Indexes and Consumer Price Indexes, 1949-1985 56
23. Retail Food Price Indexes, 1949-1985 57
24. Consumer Price Indexes – Dairy Products, 1949-1985 58
25. Consumer Price Indexes – Cereal and Bakery Products, 1949-1985 60
26. Consumer Price Indexes – Fats and Oils, 1949-1985 64
27. Consumer Price Indexes – Meat, 1949-1985 65
28. Consumer Price Indexes – Beef, 1949-1985 66
29. Consumer Price Indexes – Pork and Cured Meats, 1949-1985 67
30. Consumer Price Indexes – Other Meat, 1949-1985 68
31. Consumer Price Indexes – Offal From Mammals, 1949-1985 69

V. Supply and Disposition

V.1. Cereals

44.	Wheat Flour: Supply and Disposition, 1960-1985	99
45.	Rye Flour: Supply and Disposition, 1960-1985	100
46.	Oatmeal and Rolled Oats: Supply and Disposition, 1960-1985	101
47.	Rice: Supply and Disposition, 1960-1985	102
48.	Breakfast Food: Supply and Disposition, 1960-1985	103
49.	Total Cereals: Supply and Disposition, 1960-1985	104

V.2. Sugar and Syrups

50.	Sugar: Supply and Disposition, 1960-1985	107
51.	Maple Sugar: Supply and Disposition, 1960-1985	108
52.	Honey: Supply and Disposition, 1960-1985	109
53.	Other Sugars and Syrups: Supply and Disposition, 1960-1980	110
54.	Total Sugars and Syrups: Supply and Disposition, 1960-1985	111

V.3. Pulses and Nuts

55.	Dry Beans: Supply and Disposition, 1960-1985	115
56.	Dry Peas: Supply and Disposition, 1960-1985	116
57.	Peanuts: Supply and Disposition, 1960-1985	117
58.	Tree Nuts: Supply and Disposition, 1960-1985	118
59.	Total Pulses and Nuts: Supply and Disposition, 1960-1985	119

V.4. Fats and Oils

60.	Margarine: Supply and Disposition, 1960-1984	123
61.	Shortening and Shortening Oils: Supply and Disposition, 1960-1984	124
62.	Salad Oil: Supply and Disposition, 1960-1984	125
63.	Creamery Butter: Supply and Disposition, 1960-1984	126
64.	Total Fats and Oils: Supply and Disposition, 1960-1984	127

V.5. Fruits

65.	Tomatoes, Fresh: Supply and Disposition, 1960-1984	131
66.	Tomatoes, Canned: Supply and Disposition, 1960-1984	132
67.	Tomato Juice: Supply and Disposition, 1960-1984	133
68.	Total Tomatoes: Per Capita Disappearance, 1960-1984	134
69.	Oranges, Fresh: Supply and Disposition, 1960-1984	135
70.	Orange Juice: Supply and Disposition, 1960-1984	136
71.	Lemons, Fresh: Supply and Disposition, 1960-1984	137
72.	Lemon Juice: Supply and Disposition, 1960-1984	138
73.	Grapefruit, Fresh: Supply and Disposition, 1960-1984	138

V. Ressources et utilisation

V.1. Céréales

44.	Farine de blé: ressources et utilisation, 1960-1985	99
45.	Farine de tourteau de seigle: ressources et utilisation, 1960-1985	100
46.	Farine d'avoine: ressources et utilisation, 1960-1985	101
47.	Riz: ressources et utilisation, 1960-1985	102
48.	Céréales pour le petit déjeuner: ressources et utilisation, 1960-1985	103
49.	Total des céréales: ressources et utilisation, 1960-1985	104

V.2. Sucre et sirops

50.	Sucre: ressources et utilisation, 1960-1985	107
51.	Sucre d'érable: ressources et utilisation, 1960-1985	108
52.	Miel: ressources et utilisation, 1960-1985	109
53.	Autres sucres et sirops: ressources et utilisation, 1960-1980	110
54.	Total du sucre et du sirop: ressources et utilisation, 1960-1985	111

V.3. Légumes à cosses secs et noix

55.	Haricots secs: ressources et utilisation, 1960-1985	115
56.	Pois secs: ressources et utilisation, 1960-1985	116
57.	Arachides: ressources et utilisation, 1960-1985	117
58.	Noix: ressources et utilisation, 1960-1985	118
59.	Total légumes à cosses secs et noix: ressources et utilisation, 1960-1985	119

V.4. Huiles et corps gras

60.	Margarine: ressources et utilisation, 1960-1984	123
61.	Graisse et huile vegetale: ressources et utilisation, 1960-1984	124
62.	Huile de table: ressources et utilisation, 1960-1984	125
63.	Beurre de beurrerie: ressources et utilisation, 1960-1984	126
64.	Total huiles et corps gras: ressources et utilisation, 1960-1984	127

V.5. Fruits

65.	Tomates fraîches: ressources et utilisation, 1960-1984	131
66.	Tomates en conserve: ressources et utilisation, 1960-1984	132
67.	Jus de tomate: ressources et utilisation, 1960-1984	133
68.	Total pour les tomates: disparition par personne, 1960-1984	134
69.	Oranges fraîches: ressources et utilisation, 1960-1984	135
70.	Jus d'orange: ressources et utilisation, 1960-1984	136
71.	Citrons frais: ressources et utilisation, 1960-1984	137
72.	Jus de citron: ressources et utilisation, 1960-1984	138

		Page
73.	Pamplemousse frais: ressources et utilisation, 1960-1984	139
74.	Jus de pamplemousse: ressources et utilisation, 1960-1984	140
75.	Total agrumes: ressources et utilisation, 1960-1984	141
76.	Pommes fraîches: ressources et utilisation, 1960-1984	142
77.	Pommes en conserve: ressources et utilisation, 1960-1984	143
78.	Jus de pomme: ressources et utilisation, 1960-1984	144
79.	Pommes congelées: ressources et utilisation, 1960-1984	145
80.	Pommes sèchées: ressources et utilisation, 1960-1984	146
81.	Compote de pommes ressources et utilisation, 1960-1984	147
82.	Garniture de tarte aux pommes: ressources et utilisation, 1960-1984	148
83.	Abricots frais: ressources et utilisation, 1960-1984	149
84.	Abricots en conserve: ressources et utilisation, 1960-1984	150
85.	Bananes fraîches: ressources et utilisation, 1960-1984	151
86.	Bleuets frais: ressources et utilisation, 1960-1984	152
87.	Cerises fraîches: ressources et utilisation, 1960-1984	153
88.	Canneberges fraîches: ressources et utilisation, 1960-1984	154
89.	Raisins frais: ressources et utilisation, 1960-1984	155
90.	Jus de raisins: ressources et utilisation, 1960-1984	156
91.	Melons frais: ressources et utilisation, 1960-1984	157
92.	Pêches fraîches: ressources et utilisation, 1960-1984	158
93.	Pêches en conserve: ressources et utilisation, 1960-1984	159
94.	Poires fraîches: ressources et utilisation, 1960-1984	160
95.	Poires en conserve: ressources et utilisation, 1960-1984	161
96.	Ananas frais: ressources et utilisation, 1960-1984	162
97.	Ananas en conserve: ressources et utilisation, 1960-1984	163
98.	Jus d'ananas: ressources et utilisation, 1960-1984	164
99.	Prunes fraîches: ressources et utilisation, 1960-1984	165
100.	Prunes en conserve: ressources et utilisation, 1960-1984	166
101.	Framboises fraîches: ressources et utilisation, 1960-1984	167
102.	Framboises congelées: ressources et utilisation, 1960-1984	168
103.	Fraises fraîches: ressources et utilisation, 1960-1984	169
104.	Fraises congelées: ressources et utilisation, 1960-1984	170
105.	Total fruits frais: ressources et utilisation, 1960-1984	171
106.	Total fruit en conserve: ressources et utilisation, 1960-1984	172
107.	Total fruits congelé: ressources et utilisation, 1960-1984	173
108.	Total jus de fruits: ressources et utilisation, 1960-1984	174
109.	Total fruits seches: ressources et utilisation, 1960-1984	175
110.	Confitures, gelées, marmelades: ressources et utilisation, 1960-1984	176
111.	Total, les autres fruits: ressources et utilisation, 1960-1984	177
112.	Total fruits: ressources et utilisation, 1960-1984	178
V.6.	**Légumes**	
113.	Choux frais: ressources et utilisation, 1960-1984	181
114.	Laitue fraîche: ressources et utilisation, 1960-1984	182
115.	Asperges fraîches: ressources et utilisation, 1960-1984	183
116.	Asperges en conserve: ressources et utilisation, 1960-1984	184
117.	Haricots verts et jaunes, frais: ressources et utilisation, 1960-1984	185
118.	Haricots verts et jaunes en conserve: ressources et utilisation, 1960-1984	186
119.	Haricots verts et jaunes congelés: ressources et utilisation, 1960-1984	187
120.	Betteraves fraîches: ressources et utilisation, 1960-1984	188
121.	Betteraves en conserve: ressources et utilisation, 1960-1984	189
122.	Brocoli frais: ressources et utilisation, 1966-1984	190
123.	Brocoli congelé: ressources et utilisation, 1962-1984	191
124.	Choux de bruxelles frais: ressources et utilisation, 1965-1984	192
125.	Choux de bruxelles congelés ressources et utilisation, 1963-1984	193

		Page
126.	Carottes fraîches: ressources et utilisation, 1960-1984	194
127.	Carottes en conserve: ressources et utilisation, 1960-1984	195
128.	Carottes congelées: ressources et utilisation, 1968-1984	196
129.	Choux-fleurs frais: ressources et utilisation, 1960-1984	197
130.	Choux-fleurs congelés: ressources et utilisation, 1969-1984	198
131.	Céleri frais: ressources et utilisation, 1960-1984	199
132.	Maïs frais: ressources et utilisation, 1960-1984	200
133.	Maïs en conserve: ressources et utilisation, 1960-1984	201
134.	Maïs congelé: ressources et utilisation, 1960-1984	202
135.	Concombres frais: ressources et utilisation, 1961-1984	203
136.	Oignons frais: ressources et utilisation, 1960-1984	204
137.	Panais frais: ressources et utilisation, 1960-1984	205
138.	Pois frais: ressources et utilisation, 1960-1984	206
139.	Pois en conserve: ressources et utilisation, 1960-1984	207
140.	Pois congelés: ressources et utilisation, 1960-1984	208
141.	Piments frais: ressources et utilisation, 1960-1984	209
142.	Radis frais: ressources et utilisation, 1960-1984	210
143.	Rutabagas frais: ressources et utilisation, 1960-1984	211
144.	Champignons frais: ressources et utilisation, 1964-1984	212
145.	Champignons en conserve: ressources et utilisation, 1960-1984	213
146.	Total légumes frais: ressources et utilisation, 1960-1984	214
147.	Total légumes en conserve: ressources et utilisation, 1960-1984	215
148.	Total légumes congelé: ressources et utilisation, 1960-1984	216
149.	Total légumes: ressources et utilisation, 1960-1984	217
150.	Pommes de terre blanches: ressources et utilisation, 1960-1984	218
151.	Pommes de terre sucrées: ressources et utilisation, 1960-1984	219
152.	Total pommes de terre: ressources et utilisation, 1960-1984	220
V.7.	**Produits des animaux**	
153.	Porc: ressources et utilisation, 1960-1985	223
154.	Boeuf: ressources et utilisation, 1960-1985	224
155.	Veau: ressources et utilisation, 1960-1985	225
156.	Mouton et agneau: ressources et utilisation, 1960-1985	226
157.	Abats: ressources et utilisation, 1960-1985	227
158.	Viandes totales: ressources et utilisation, 1960-1985	228
159.	Oeufs: ressources et utilisation, 1960-1985	229
160.	Poulet: ressources et utilisation, 1963-1985	230
161.	Poule: ressources et utilisation, 1963-1985	231
162.	Dinde: ressources et utilisation, 1960-1985	232
163.	Viande de volaille: disparition par personne, 1963-1985	233
164.	Poissons et crustages, frais et congelés: ressources et utilisation, 1960-1984	234
165.	Poissons et crustaces, traites (fumés, salés, marinés): ressources et utilisation, 1960-1983	235
166.	Poissons et crustaces, en conserve: ressources et utilisation, 1960-1983	236
167.	Poissons d'eau douce: ressources et utilisation, 1960-1983	237
168.	Total poissons et crustaces: ressources et utilisation, 1960-1983	238
169.	Fromage cheddar: ressources et utilisation, 1960-1985	239
170.	Fromage fondu: ressources et utilisation, 1960-1985	240
171.	Fromages de spécialité: ressources et utilisation, 1960-1985	241
172.	Fromage cottage: ressources et utilisation, 1960-1985	242
173.	Poudre de lait écrémé: ressources et utilisation, 1960-1985	243
174.	Lait entier évaporé: ressources et utilisation, 1960-1985	244
175.	Lait entier condensé: ressources et utilisation, 1960-1985	245
176.	Crème glacée: ressources et utilisation, 1960-1985	246
177.	Lait homogénéisé (3,5%): ressources et utilisation, 1960-1985	247
178.	Lait partiellement écrémé (2%): ressources et utilisation, 1961-1985	248

Page

179. Lait écrémé liquide: ressources et utilisation, 1960-1985 249
180. Lait partiellement écrémé chocolaté: ressources et utilisation, 1960-1985 250
181. Yogourt: ressources et utilisation, 1960-1985 251

V.9. **Breuvages**

182. Thé: ressources et utilisation, 1960-1985 255
183. Café: ressources et utilisation, 1960-1985 256
184. Cacao: ressources et utilisation, 1960-1985 257
185. Ventes totales des boissons alcooliques, 1974-1985 258
186. Boissons gazeuses: ressources et utilisation, 1974-1985 259

VI. Divers tableaux sur les Etats-Unis

187. Dépenses alimentaires en tant que pourcentage du revenu disponible, E.-U., 1960-1984 261
188. E.-U., indices des prix au détail et indices des prix à la consommation, certaines périodes 262
189. E.-U., indices des prix au détail: aliments principaux, certaines périodes 263
190. Consommation par habitant des principales denrées de la population civile, aux Etats-Unis, certaines années 264

VII. Divers tableaux sur les pays de l'OCDE et le monde

191. Produit intérieur brut des pays de l'OCDE, 1976-1985 269
192. Population des pays de l'OCDE, 1976-1984 270
193. Revenu personnel disponible, certains pays, 1964-1983 271
194. Dépenses personnelles en aliments, breuvages et tabac, certains pays, 1963-1983 272
195. Dépenses en aliments, breuvages et tabac, en tant que pourcentage du revenu personnel disponible, certains pays, 1963-1983 273
196. Dépenses personnelles en aliments, certains pays 1971-1983 274
197. Dépenses en aliments en tant que pourcentage du revenu personnel disponible, certains pays 1971-1983 275
198. Consommation apparente de blé par personne (kilogrammes), pays de l'OCDE, 1962-1982 276
199. Consommation apparente de tous les céréales, comprenant le riz, par personne (kilogrammes), pays de l'OCDE, 1962-1982 277
200. Consommation apparente de sucre par personne (kilogrammes, valeur raffiné), pays de l'OCDE, 1962-1982 278
201. Consommation apparente de tous les sucres par personne (kilogrammes), pays de l'OCDE, 1962-1982 279
202. Consommation apparente de tous les légumes comprenant les pommes de terre, par personne (kilogrammes, équivalent frais), pays de l'OCDE, 1962-1982 280
203. Consommation apparente de tous les légumes à secs, noix et graines, par personne (kilogrammes), pays de l'OCDE, 1962-1982 281
204. Consommation apparente de tous les fruits par personne (kilogrammes, équivalent frais), pays de l'OCDE, 1962-1982 282
205. Consommation apparente de boeuf par personne (kilogrammes, poids de carcasse), pays de l'OCDE, 1962-1982 283
206. Consommation apparente de porc par personne (kilogrammes, poids de carcasse), pays de l'OCDE, 1962-1982 284
207. Consommation apparente de volaille par personne (kilogrammes, poids éviscéré), pays de l'OCDE, 1962-1982 285
208. Consommation apparente de viande par personne (kilogrammes, poids de carcasse), pays de l'OCDE, 1962-1982 286
209. Consommation apparente d'oeufs par personne (kilogrammes), pays de l'OCDE, 1962-1982 287

Page

210. Consommation apparente de produits laitiérs sauf le beurre par personne (kilogrammes), pays de l'OCDE, 1962-1982 288
211. Consommation apparente de poisson par personne (kilogrammes, poids de produit), pays de l'OCDE, 1962-1982 289
212. Consommation apparente d'huiles et corps gras par personne (kilogrammes, contenu de corps gras), pays de l'OCDE, 1962-1982 290
213. Consommation apparente de boissons alcooliques par personne (kilogrammes), pays de l'OCDE, 1962-1982 291
214. Consommation apparente de calories provenant de produits cultivés par personne (calories/jour), pays de l'OCDE, 1962-1982 292
215. Consommation apparente de calories provenant de produits animaux par personne (calories/jour), pays de l'OCDE, 1962-1982 293
216. Consommation apparente de calories par personne (calories/jour) pays de l'OCDE, 1962-1982 294
217. Indices des prix à la consommation des pays de l'OCDE, 1982-1985 295
218. Indices des prix à la consommation, 1975-1984 296
219. Cours du change en dollars canadiens par unité, 1970-1985 297

Projection 1 is based on a low net international migration, an internal migration flow more favorable for Ontario and Manitoba until early 1990's, most favorable for Atlantic provinces and Saskatchewan throughout the projection period, and with a current fertility level of 1.66 for Canada which will decline to 1.4 by 1996 and remain constant thereafter (14LC).

La projection 1 est basée sur les hypothèses suivantes: une migration internationale basse; une migration interprovinciale forte pour l'Ontario et le Manitoba jusqu'au début des années 90 et la plus forte pour les provinces de l'Atlantique et la Saskatchewan tout au long de la période de projection; un taux de fécondité de 1.66 qui tombera jusqu'à 1.4 en 1996 et y restera ensuite.

Projection 2 is based on a low net international migration, an internal migration flow more favorable for Alberta and British Columbia, and with a current fertility level of 1.66 for Canada which will decline to 1.4 by 1996 and remain constant thereafter(14LD).

La projection 2 est basée sur les hypothèses suivantes: une migration internationale basse; une migration interprovinciale forte pour la Colombie-Britannique et l'Alberta; un taux de fécondité de 1.66 qui tombera jusqu'à 1.4 en 1996 et y restera ensuite.

Projection 3 is based on a low net international migration, an internal migration flow more favorable for Alberta and British Columbia, and with a current fertility level of 1.66 for Canada which will remain constant during the entire projection period(16LD).

La projection 3 est basée sur les hypothèses suivantes: une migration internationale basse; une migration interprovinciale forte pour la Colombie-Britannique et l'Alberta; un taux de fécondité de 1.66 qui se maintiendra tout au long de la période de projection.

Projection 4 is based on a high net international migration, an internal migration flow more favorable for Ontario and Manitoba until early 1990's, most favorable for Atlantic provinces and Saskatchewan throughout the projection period, and with a current fertility level of 1.66 for Canada which will remain constant during the entire projection period (16HC).

La projection 4 est basée sur les hypothèses suivantes: une haute migration internationale; une migration interprovinciale forte pour l'Ontario et le Manitoba jusqu'au début des années 90 et la plus forte pour les provinces de l'Atlantique et la Saskatchewan tout au long de la période de projection; un taux de fécondité de 1.66 qui se maintiendra tout au long de la période.

Projection 5 is based on a high net international migration, an internal migration flow more favorable for Atlantic provinces, Ontario, Manitoba and Saskatchewan, and with a current fertility level of 1.66 children per woman for Canada which will remain constant until 1985 and then take an upturn to reach a level of 2.2 by 1996 and remain constant thereafter (22HA).

La projection 5 est basée sur les hypothèses suivantes: une haute migration internationale; une migration interprovinciale forte pour les provinces de l'Atlantique, l'Ontario, le Manitoba et le Saskatchewan; un taux de fécondité de 1.66 qui se maintiendra jusqu'à 1985, augmentera jusqu'à 2.2 en 1996 et y restera ensuite.

[a] Provincial data has not been adjusted to reflect the July 1986 revision of the National Income and Accounts data.

Les données provinciales n'ont pas été ajustées pour tenir compte de la révision des données des comptes nationaux des revenus et des dépenses.

[b] For the years 1947-1950 inclusive, data for the Yukon and Northwest Territories are included with those for British Columbia. Excludes personal disposable income of Canadians temporarily abroad.

De 1947 à 1950 inclusivement, les données relatives au Yukon et aux Territoires du Nord-Ouest ont été inclues dans celles de la Colombie-Britannique. Revenu personnel disponible des canadiens se trouvant temporairement à l'étranger sont exclues.

[c] Taxes and other transfers paid by Canadians temporarily abroad, with the exception of employer and employee contributions to public service pensions for 1951 and on, cannot be estimated separately, and are included in the provincial estimates.

A partir de 1951 les impôts et les autres transferts provenant des Canadiens se trouvant temporairement à l'étranger, à l'exception des cotisants des employeurs et des employés au régime de pension de la fonction publique, ne pouvant être évalués indépendamment, ont été compris dans les estimations provinciales.

1985	122.4	127.3

[a] The implicit indexes are currently weighted price indexes. They reflect not only price changes, but also changing expenditure patterns within and between major groups. They are derived by dividing the total in current dollars by the total in constant dollars.
Ces indices implicites sont des indices de prix à pondération courante. Ils reflètent non seulement des variations de prix, mais aussi les changements dans la structure des dépenses au sein des principaux groupes et entre ces derniers. L'indice implicite des prix utilisé pour la dépense nationale brute s'obtient en divisant le total en dollars courants par le total en dollars constants.

RETAIL FOOD PRICE INDEXES

INDICES DES PRIX DES ALIMENTS AU DÉTAIL

Source: Consumer price indexes of food products were obtained from the Statistics Canada CANSIM Cross-Classified database in January 1986, unless otherwise specified. This data is also contained in Statistics Canada Catalogue No. 62-010, *Prices and Price Indexes*.

L'indice des prix à la consommation des aliments provient de la Banque de données à classification hétérogène Cansim de Statistique Canada de janvier 1986, sauf avis contraire. Ces données se trouvent également dans la publication nº 62-010 de Statistique Canada, *Prix à la consommation des indices des prix*.

[a] An asterisk indicates an unpriced basic grouping or aggregate. For commodity categories marked with an asterisk, "Other ..." means that there is only one basic grouping in this category; "All other ..." means that this category is an aggregate of basic groupings.
Un astérisque indique un groupe de base ou un agrégat ne faisant pas l'objet d'un relevé de prix. Pour les catégories de produits identifiées par un astérisque, «Autre ...» signifie qu'il n'y a qu'un seul groupe de base dans cette catégorie; «Tout autre ...» signifie que cette catégorie est un agrégat de plusieurs groupes de base.

[b] These weights show the relationships that existed in the survey year.
Ces pondérations indiquent les rapports qui existaient lors de l'année de l'enquête.

[a] All data reflect the January 1976 revision in the *National Income and Product Accounts*.
Toutes les données ont été ajustées selon la révision parue dans les *Comptes de revenu et de produits nationaux*.

[b] Data from the Department of Commerce in "The Survey of Current Business". Omits alcoholic beverages, food donated by government agencies to schools and needy persons, and non-personal spending for food such as business purchases of meals, food furnished to inmates of hospitals and institutions, and food included with transportation tickets and camp fees.
Ces données sont tirées de «Survey of current business» produit par le ministère du Commerce. Les données sur les boissons alcooliques, les aliments distribués par des agences gouvernementales, aux écoles, aux misèreux ou pour des dépenses alimentaires non personnelles telles que dépenses d'affaire, pensions alimentaires d'hôpitaux et d'institutions, ainsi que les repas compris a l'achat de billet de transport ou dans les tarifs de campement, ne sont pas incluses.

[c] Includes food consumed on farms where produced.
Comprend les aliments consommés sur la ferme, au lieu de production.

[d] Includes food served to the military and employees of hospitals, prisons, and food service establishments.
Comprend les aliments servis aux militaires, employés d'hôpitaux, de prisons et de service de restauration.

[e] Preliminary.
Provisoire.

Sugar (refined)	97.4	98.5	94.2	91.5	89.3	83.6	79.5	75.8	71.0	67.5	Sucre (raffiné)
Civilian population[d]	178.1	195.3	218.1	220.5	223.0	225.6	227.9	230.1	232.3	234.4	Population civile[d]

[a] Quantity in pounds, retail weight unless otherwise shown. Data on calendar year basis except for dried fruits, fresh citrus fruits, peanuts, and rice which are on the crop-year basis. Includes data only for those items reported for the entire series.

A moins de spécifications contraires le poids en livre représente le poids au détail. Les données suivent l'année civile à l'exception des fruits séchés, des agrumes frais, des arachides et du riz qui sont basés sur la campagne agricole.

[b] Commercial production for sale as fresh produce.

Production commerciale pour la vente à l'état frais.

[c] White, whole wheat, and semolina flour including use in bakery products.

Comprend la farine blanche, la farine de blé entier et la semoule incorporées dans les produits de boulangerie.

[d] July 1 civilian population used to derive per capita figures except for sugar, dried fruits, peanuts, and rice.

La population du 1er juillet a été utilisée dans le calcul de la consommation par habitant, sauf pour le sucre, les fruits séchés, les arachides et le riz.

NOTES AND DEFINITIONS

NOTES ET DÉFINITIONS

SECTION I.

Population

Tables 1-2:

TABLE 1: For population census purposes, each person was counted in the locality of his regular domicile rather than the place where he happened to be staying at the census date i.e., midnight May 31 - June 1.

Estimates for non-census years were obtained by adding births and immigration and deducting deaths and an estimate of immigration from the census population count. Family allowance statistics were used to etimate interprovincial migration.

TABLE 2: These projections are not predictions; they reflect the future growth trends, the emerging age-sex structure and the population distribution across the country under the stated assumptions. *Population Projections For Canada and the Provinces, 1981-2006*, Statistics Canada, Cat. No. 91-520.

SECTION II.

Income and Food Expenditure

Tables 3-14:

GROSS DOMESTIC PRODUCT (GDP) - This concept measures the total value of goods and services at market prices produced in Canada using the factors of production of both Canadians and non-Canadians. For a more detail explanation refer to *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL EXPENDITURE ON CONSUMER GOODS AND SERVICES - Includes personal outlays for durable goods, non-durable goods, semi-durable goods and services. The estimates include implied expenditures out of income-in-kind such as food grown and consumed on the farm and imputed rents on owner-occupied housing. Expenditures of Canadian residents temporarily abroad (e.g., tourists and members of armed forces) are included while expenditure of foreign residents temporarily in Canada are excluded. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL INCOME - Includes all forms of income received by persons and unincorporated businesses; (1) wages, salaries and supplementary labor income; (2) military pay and allowances; (3) net income of non-farm business including rent; (4) net income of farm operators from farm production; (5) interest, dividends and miscellaneous investment income; and (6) transfer payment income from government, from corporations and from non-residents. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

PERSONAL DISPOSABLE INCOME - Personal income (defined above) minus direct taxes and other current transfers to government. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549

PERSONAL NET SAVINGS - Personal disposable income (defined above) minus personal expenditure on goods and services, current transfers to corporation and current transfers to non-residents. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

CURRENT DOLLARS - Prices of the current period are used to value quantities.

CONSTANT DOLLARS - Quantities are measured in current prices and then re-priced to the base period (1981).

IMPLICIT PRICE INDEXES - The implicit price indexes of Gross National Expenditure and its components, which are given in Table 14, are essentially a by-product to the deflation process. The overall implicit price index of Gross National Product is a comprehensive indicator available in Canada for measuring price change, since it covers the entire range of goods and services produced and sold in the economy. It is used as a measure of price change taking place in the economy as a whole.

These implicit indexes are currently weighted price indexes. They reflect not only price changes, but also changing expenditure patterns within and between major groups. They are derived by dividing the total in current dollars by the total in constant dollars. *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549.

SECTION III.

Family Expenditures

Tables 15-20:

The data in these tables are based on a stratified clustered sample drawn from the Labour Force Area sample for selected census metropolitan areas.

Excluded from the tables are: (1) family units of official representatives of foreign countries living in Canada; (2) families living in collective households such as hospitals and military establishments; (3) inmates living full-time in institutions; (4) part-year spending units composed of families who had immigrated to Canada during the survey year; (5) units formed by marriage during the year of persons who had both been members of existing spending units; and (6) families who became independent spending units.

For detailed tables on average expenditure as well as an explanation of its components, please refer to *Urban Family Expenditure, 1972*, Cat. No. 62-541, *Introduction*.

TABLE 15: The data in this table are based on a stratified clustered sample drawn from the Labour Force Area sample for 14 census metropolitan areas; St. John's, Halifax, Saint John, Quebec, Montreal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vancouver.

TABLE 16: Although the fourteen cities of the 1974 survey were covered in the 1969 survey, they were not identified as a specific group. To facilitate comparison between the 1969 and the 1974 data, Statistics Canada made available selective tables. See *Urban Family Food Expenditure 1974*, Cat. No. 62-542.

TABLE 17: This survey was confined to eight major cities; St. John's, Halifax, Montreal, Ottawa, Toronto, Winnipeg, Edmonton and Vancouver. See *Urban Family Food Expenditure 1976*, Cat. No. 62-545.

TABLE 18: The *1978 Urban Family Food Expenditure Survey* was carried in 16 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vanvouver. See *Urban Family Food Expenditure 1978*, Cat. No. 62-548.

TABLE 19: The *1982 Family Food Expenditure Survey* was carried in 16 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vanvouver. See *Family Food Expenditure in Canada, 1982*, Cat. No. 62-554.

TABLE 20: The *1984 Family Food Expenditure Survey* was carried in 17 cities across Canada; St. John's, Charlottetown, Summerside, Saint John, Halifax, Quebec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vanvouver and Victoria. See *Family Food Expenditure in Canada, 1984, Selected Cities*, Cat. No. 62-554.

INCOME – Includes: gross income from wages and salaries; net income before taxes from self-employment; receipts from military pay and allowances; gross receipts from roomers and boarders; net rental; family allowances; interest and dividends; all pensions; workmen's compensation and unemployment insurance benefits; regular receipts from insurance policies and annuities; and miscellaneous regular income receipts. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, p.xvii.

INCOME QUINTILE – Refer to the division of family units into five categories of income. The first fifth consists of the family units with the lowest incomes, the second fifth the second lowest incomes, etc.

FAMILY – The family or spending unit is defined as a group of persons dependent on a common or pooled income for the major items of expense and living in the same dwelling, or one financially independent individual living alone. Never married sons or daughters living with their parents are considered as part of their parents' spending unit. In the great majority of cases, the members of spending units of two or more are related by blood, marriage or adoption, and are thus consistent with the "economic family" definition employed in surveys of family income, "a group of individuals sharing a common dwelling unit and related by blood marriage or adoption." The definition of a family employed by the population census restricts the family to husband, wife and any unmarried children living with them, or one parent and unmarried children. Individual or one-person spending units are financially

independent persons living alone or as roomers. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, pp. xv-xvi.

UNATTACHED INDIVIDUALS – Persons living alone or rooming in a household where they are not related to other household members. *Family Expenditure in Canada*, Statistics Canada, Cat. No. 62-535, Vol. 1, p.7.

WEIGHTED NUMBER OF FAMILIES – These are aggregates of the figures used in the weighting or records in each class and should be used in combining classes. *Urban Family Expenditure 1972*, Statistics Canada, Cat. No. 62-541, p. xvii.

SECTION IV.

Retail Food Indexes

Tables 21-43:

CONSUMER PRICE INDEX – The Consumer Price Index (CPI) measures the percentage change through time in the cost of purchasing a constant "basket" of goods and services representing the purchases by a particular population group in a specific time period. The CPI is expressed in terms of 1981 = 100. As of January 1983, retail price indexes are based on 1982 expenditure patterns and are linked to their predecessor at March 1982. *The Consumer Price Index Reference Paper,Updating Based on 1982 Expenditures*. Statistics Canada, Cat. No. 62-553, occasional, Ottawa, February 1985.

WEIGHTING DIAGRAM OF THE CPI – Each item included in the index has a weight which was determined from the amount of money reported spent or committed on each item or group of items in the survey period. The weight determines the influence that price changes of items have on the movement of the total CPI. If one item has ten times the weight of another, then the same price change in both items will affect the movement of the total index in the ratio ten to one. The weights are revised periodically to reflect the most current expenditure pattern data available.

SECTION V.

Supply and Disposition

TABLES 44-186: These tables present the balance sheet showing the supply and disposition of each food item. To obtain gross supply, imports and beginning stocks are added to production estimates. This figure minus exports and ending stocks produces net supply. Fresh and frozen food stock statistics are based on quantities held in cold storage and wholesale warehouses. Stocks of other manufactured goods represent inventories held at the plant level.

The approximate amount of food available for human consumption is found by subtracting seed requirements, manufacturing inputs, livestock feed and waste where applicable from the net food supply.

The data for the components of the food balance sheets are mainly derived from farm surveys and reports by firms engaged in producing and marketing in the food industry. The net food figure represents the supply of food leaving the wholesale level destined for retail distribution.

The waste factors used for specific commodities attempt to account for waste up to the retail level but do not allow for losses in stores, households, private institutions or restaurants.

Per capita values do not represent total food suplies actually consumed by an individual or specific group of individuals but provide data on what is available for consumption on the average by the total Canadian population on July 1.

The measurement of per capita retail weight values in other forms such as fresh equivalent weight, edible weight and milk solids involves the use of average conversion factors.

The most current and up-to-date supply and disappearance data were retrieved in July 1986 from the Cansim Cross-Classified System. Cansim is a Statistics Canada computerized data bank.

SECTION VI.

Selected tables for the United States

Tables 187-190:

PERSONAL INCOME – Personal income is the current income received by persons from all sources, inclusive of transfers from government and business but exclusive of transfers among persons. Not only individuals (including owners of unincorporated enterprises), but non-profit institutions, private trust funds, and private health and welfare funds are classified as "persons". Personal income is measured on a before-tax basis as the sum of wage and salary disbursements, other labor income, proprietors' and rental income, interest and dividends, and transfer payments, minus personal contributions for social insurance. *The National Income and Product Accounts of the United States*, 1929-1965, Statistics Tables, U.S. Department of Commerce p.viii.

The concept of personal income in Canada is slightly different from that in the United States. In Canada, employer and employee contributions to social insurance and government pension funds are included as a part of personal income on the income side, and are regarded as a part of current transfer to government (taxes) on the outlay side of the persons and unincorporated business account.

In the United States, employer and employee contributions to social insurance and government pension funds are not included in personal income, and are not therefore shown on the disposition side of the personal income and its disposition account. These differences in treatment affect the levels of personal income between the two countries, but they do not affect the estimates of disposable income, personal net saving, or the savings ratio (personal savings as a percentage of disposable income). *National Income and Expenditure Accounts*, Statistics Canada, Cat. No. 13-549, p 332.

PERSONAL DISPOSABLE INCOME - Income remaining with persons after deductions of personal tax and non-tax payments to general government. It is the income available for spending or savings. *The National Income and Product Accounts of the United States, 1929-1985*, Statistics Tables, U.S. Department of Commerce, p. viii.

PERSONAL CONSUMPTION EXPENDITURES – Consists of the market value of purchases of goods and services by persons and non-profit institutions and the value of food, clothing, housing, and financial services received by them as income-in-kind. It includes the rental value of owner-occupied houses but does not include purchases of dwellings which are classified as capital goods. *The National Income and Product Accounts of the United States, 1929-1985*, Statistics Tables, U.S. Department of Commerce, p. viii.

SECTION VII.

Selected Tables for the OECD and the World

Tables 191-219:

GROSS DOMESTIC PRODUCT – Gross domestic product (GDP) measures the value of production arising within the geographical boundaries of a country irrespective of weather the factors of production involved are resident or non-resident. The GNP is designed to measure the production of the nation's residents only and to exclude the production of non-resident factors of production.

TABLE 191: It should be emphasized that exchange rates used to convert national currencies into U.S. dollars do not necessarily reflect the relations between the internal purchasing powers of currencies in the various countries. Exchange rates can be affected by many factors unrelated to internal price levels including international flows of capital and temporary swings in current account balances brought about by demand management policies or various types of controls. In addition, in most countries, that part of production which is traded internationally represents only a small-sometimes a very small-part of Gross National Product so that the exchange rate is applicable only to a part of the country's total economic production.

PRIVATE FINAL CONSUMPTION – Under the present System of National Accounts (SNA) this now includes certain fees (such as for driving licences or passports) paid by non-profit institutions serving households, nominal fees paid by individuals for government services, and the consumption of fixed capital of certain kinds of non-profit institutions (e.g., political parties,

sports clubs) in respect of machinery and equipment. Excluded are payments by households of fees and duties imposed by government to raise revenue, final consumption expenditure and purchases of machinery and equipment by non-profit institutions serving households or public authorities, and - an important item - bank service charges imputed to households. *National Accounts of OECD Countries*, Vol. II, p. 364, 1974.

SECTION I.

Population

Tableaux 1-2:

TABLEAU 1: Aux fins du recensement de la population, chaque personne a été recensée dans la localité de son domicile habituel, plutôt qu'à l'endroit où elle se trouvait le jour du recensement, c'est-à-dire à minuit entre le 31 mai et le 1er juin.

Les estimations pour les années autres que celles de recensement ont été obtenues en additionnant le nombre de naissances et le nombre d'immigrés et en soustrayant le nombre de décès et une estimation du nombre d'émigrés. Les statistiques sur les allocations familiales ont été utilisées pour établir une estimation de la migration entre les provinces.

TABLEAU 2: Ces projections ne constituent évidemment pas des prédictions; elles reflètent seulement l'évolution future de la croissance démographique, la structure d'âge et de sexe et la répartition géographique de la population en fonction des hypothèses énoncées. *Projections démographiques pour le Canada et les provinces, 1981-2006*, Statistique Canada, nº de catalogue 91-520.

SECTION II.

Revenus et dépenses alimentaires

Tableaux 3-14:

PRODUIT INTERIEUR BRUT (P.I.B.) – Une mesure de la valeur totale des biens et services du pays aux prix du marché fondée sur les facteurs de production du Canada et d'ailleurs. Pour de plus amples détails, consulter: *Comptes nationaux des revenus et des dépenses*, Statistique Canada, no de catalogue 13-549.

DEPENSES PERSONNELLES EN BIENS ET SERVICES DE CONSOMMATION – Comprennent les dépenses personnelles en biens durables, non durables, semi-durables et services. Les estimations englobent les dépenses implicites à même le revenu en nature (denrées alimentaires produites et consommées dans les fermes de loyers imputés ou fictifs à l'égard des résidents canadiens qui séjournent temporairement à l'étranger (par exemple, les touristes et les membres des forces armées) sont comprises, mais non les dépenses des résidents étrangers séjournant temporairement au Canada. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

REVENU PERSONNEL – Comprend tous les genres de revenus en espèces des particuliers et des entreprises non constituées; (1) traitements, salaires et revenu supplémentaire du travail; (2) soldes et indemnités militaires; (3) revenu net provenant d'une entreprise non agricole y compris le revenu de loyers; (4) revenu net provenant de l'exploitation agricole; (5) intérêts, dividendes et divers revenus de placements; et (6) revenus de transferts du gouvernement, des compagnies et des non résidents. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

REVENU PERSONNEL DISPONIBLE – Le revenu personnel (défini ci-dessus) moins les impôts directs et autres transferts courants du gouvernement. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

EPARGNE PERSONNELLE NETTE – Le revenu personnel disponible (défini ci-dessus) moins les dépenses personnelles en biens de consommation et de services, transferts courants aux corporations et transferts courants aux non résidents. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

DOLLARS COURANTS – Les prix de la période courante sont utilisés pour évaluer les quantités.

DOLLARS CONSTANTS – Les quantités sont évaluées à partir des prix courants et réévaluées ensuite en fonction de la période de base (1981).

INDICES IMPLICITES DES PRIX – Les indices implicites des prix de la Dépense nationale brute et de ses composantes présentés au tableau 14 sont essentiellement des sous-produits de la déflation. L'indice implicite des prix général du Produit national brut est le plus complet de tous les indicateurs existant au Canada pour la mesure des variations des prix, puisqu'il vise tous les biens et services produits et vendus sur le marché. Il sert donc de mesure de la variation des prix dans l'économie considérée dans son ensemble.

Les indices implicites des prix sont des indices de prix à pondération courante qui traduisent non seulement la variation de prix, mais aussi les changements dans le régime de dépenses du groupe visé. On les obtient en divisant le total en dollars courants par le total en dollars constants. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549.

SECTION III.

Dépenses des familles

Tableaux 15-20:

Les données de ces tableaux sont fondées sur un échantillon stratifié et groupé, tiré de l'échantillon aréolaire de la population active de certaines régions métropolitaines de recensement.

Sont exclus des tableaux: (1) les unités familiales des fonctionnaires étrangers établis au Canada; (2) les familles vivant en ménages collectifs comme les hôpitaux et les établissements militaires; (3) les pensionnaires vivant à plein temps dans des établissements; (4) les unités de dépense pour une partie de l'année comprenant des familles qui ont immigré au Canada au cours de l'année visée par l'enquête; (5) les unités formées par des mariages, au cours de l'année, de personnes qui étaient toutes deux membres d'unités de dépenses déjà existantes; et (6) les familles qui sont devenues des unités de dépenses indépendantes.

Pour des tableaux détaillés sur la dépense moyenne ainsi qu'une explication de ses éléments, consulter la publication *Dépenses des familles urbaines 1972*, Statistique Canada, nº de catalogue 62-541, Introduction.

TABLEAU 15: Les données de ce tableau sont fondées sur un échantillon stratifié et groupé, tiré de l'échantillon aréolaire de la population active de quatorze régions métropolitaines: Saint-Jean (T.-N.), Halifax, Saint-Jean (N.-B.), Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver.

TABLEAU 16. Bien que les quatorze villes couvertes par l'enquête de 1974 étaient incluses dans celles de 1969, elles ne constituaient pas un groupe spécifique. Pour permettre la comparaison entre les deux enquêtes, Statistique Canada a produit des tableaux spéciaux. *Dépenses alimentaires des familles urbaines, 1974*, nº de catalogue 62 542.

TABLEAU 17: Cette enquête n'a couvert que huit grandes villes: Saint-Jean (T.-N.), Halifax, Montréal, Ottawa, Toronto, Winnipeg, Edmonton et Vancouver, *Dépenses alimentaires des familles urbaines, 1976*, nº de catalogue 62-545.

TABLEAU 18: L'enquête de 1978 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 16 villes d'un bout à l'autre du Canada : Saint Jean (T.-N.), Charlottetown, Summerside, Saint Jean (N.-B.), Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver. *Dépenses alimentaires des familles urbaines, 1978*, nº de catalogue 62-548.

TABLEAU 19: L'enquête de 1982 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 16 villes d'un bout à l'autre du Canada : Saint Jean (T.-N.), Charlottetown, Summerside, Saint Jean (N.-B.), Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton et Vancouver. *Dépenses alimentaires des familles urbaines au Canada, 1982*, nº de catalogue 62-554.

TABLEAU 20: L'enquête de 1984 sur les dépenses alimentaires des familles urbaines, a été réalisée dans 17 villes d'un bout à l'autre du Canada : Saint Jean (T.-N.), Charlottetown, Summerside, Saint Jean (N.-B.), Halifax, Québec, Montréal, Ottawa, Toronto, Thunder Bay, Winnipeg, Regina, Saskatoon, Calgary, Edmonton, Vancouver et Victoria. *Dépenses alimentaires des familles urbaines au Canada, villes choisies, 1984*, nº de catalogue 62-554.

REVENU – Sont inclus: le revenu brut tiré des traitements et salaires; le revenu net avant déduction fiscale, tiré de l'emploi indépendant; les recettes découlant de la solde et des allocations militaires; les recettes brutes tirées de «chambreurs» et des pensionnaires; le montant net des loyers; les allocations familiales; l'intérêt et les dividendes; toutes les pensions; les indemnités d'accident du travail; les recettes habituelles tirées de polices d'assurance et des rentes; et les diverses recettes touchant le revenu habituel. *Dépenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xvii.

QUINTILES DE REVENU – Les quintiles représentent la division des unités familiales en cinq catégories de revenu. Le premier quintile est constitué des familles à plus bas revenu, le deuxième, du deuxième plus bas et ainsi de suite.

FAMILLE – La famille ou unité de dépense est un groupe de personnes qui dépendent d'un revenu commun ou mis en commun pour les principaux postes de dépense et qui demeurent dans la même habitation, ou un particulier financièrement indépendant vivant seul. On considère les fils ou filles célibataires qui demeurent avec leurs parents comme faisant partie de l'unité de dépense de leurs parents. Dans la plupart des cas, les membres des unités de dépense comprenant deux personnes ou plus sont apparentés par les liens du sang, du mariage ou de l'adoption et, de ce fait, répondent à la définition de la «famille économique» employée dans les enquêtes sur les revenu familial: «groupe de particuliers apparentés par le liens du sang, du mariage ou de l'adoption et qui partagent une habitation commune.» La définition de la famille selon le recensement de la population limite la famille à l'époux, l'épouse et tout enfant non marié. Les particuliers ou unités de dépense d'une seule personne sont des personnes financièrement indépendantes qui vivent seules ou en qualité de chambreurs. *Depenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xv-xvi.

PERSONNES SEULES – Personnes vivant seules ou qui occupent une chambre dans un ménage avec lequel elles n'ont aucun lien de parenté. *Dépenses des familles au Canada*, Statistique Canada. vol. 1, nº de catalogue 62-535, Vol. 1, p. 7.

NOMBRE PONDERE DE FAMILLES – Il s'agit là d'aggrégats des chiffres utilisés pour la pondération des relevés de chaque classe; ces aggrégats devraient servir à la combinaison de classes. *Dépenses des familles urbaines, 1972*, Statistique Canada, nº de catalogue 62-541, p. xvii.

SECTION IV.

L'indice des prix des aliments au détail

Tableaux 21-43:

INDICE DES PRIX A LA CONSOMMATION – L'indice des prix à la consommation (IPC) mesure la variation en pourcentage dans le temps du coût à l'achat d'un «panier» fixe de biens et de services représentant les achats d'un groupe déterminé de la population au cours d'une période donnée. L'IPC est exprimé sur la base 1981 = 100. Depuis janviers 1983, les indices des prix de détail sont fondés sur les dépenses de 1982 et sont raccordés aux indices précédents en mars 1982. *L'indice des prix à la consommation*, Révision fondée sur les dépenses de 1982. Statistique Canada, no de catalogue 62-553, Ottawa, février 1985.

DIAGRAMME DE PONDERATION DE L'IPC – Chaque article entrant dans la composition de l'indice a un poids qui représente son importance relative dans le panier de dépenses. Le poids détermine l'influence que le changement de prix de l'article a sur le mouvement de l'IPC total. Si le poids d'un article est dix foix plus grand que celui d'un autre, le même changement de prix des deux articles va influer sur le mouvement de l'indice total dans le rapport de dix à un. Les poids sont périodiquement revus de manière à tenir compte des données sur les dépenses les plus à jour.

SECTION V.

Ressources et utilisation

Tableaux 44-186:

Ces tableaux présentent le bilan annuel de les ressources et de l'utilisation de chaque produit alimentaire. Pour obtenir les ressources brutes, on ajoute les importations et les stocks initiaux aux estimations de la production. En soustrayant de ce chiffre les exportations et les stocks de fermeture, on obtient les ressources nettes. Les statistiques des stocks d'aliments frais et congelés sont fondées sur les quantités détenues en entreposage frigorifique et dans les entrepôts de gros. Les stocks des autres biens fabriqués représentent les stocks détenus à l'usine.

On obtient la quantité approximative d'aliments disponibles pour la consommation humaine en soustrayant des ressources alimentaires nettes, les semences requises, les aliments destinés à l'utilisation industrielle, les aliments pour animaux et le gaspillage, lorsqu'il y a lieu.

Les données sur les composantes des bilans alimentaires sont tirées surtout des enquêtes agricoles et des déclarations des entreprises qui s'adonnent à la production et la commercialisation dans l'industrie alimentaire. Le chiffre de la quantité nette d'aliments représente les ressources alimentaires qui partent du niveau de gros pour la distribution au détail.

Les facteurs de perte utilisés dans le cas de certains aliments visent à tenir compte de la perte qui se produit avant le niveau de détail, mais ne tiennent pas compte des pertes dans les magasins, les ménages, les institutions privées et les restaurants.

Les valeurs par personne ne représentent pas les ressources alimentaires totales effectivement consommées par une personne ou par un groupe de personnes en particulier, mais constituent des données sur ce qui est disponible à la consommation en moyenne pour la population totale du Canada au 1er juillet.

La mesure des valeurs par personne des poids de détails sous d'autres formes telles que le poids de l'équivalent en produits frais, le poids comestible et la teneur en matières solides du lait comporte l'utilisation de facteurs moyens de conversion.

Les données les plus courantes et plus récentes de l'approvisionnement et de l'utilisation ont été tirées de la base des données recoupées Cansim au mois de juillet 1986. La base de données recoupées Cansim est une banque de données informatisée de Statistique Canada.

SECTION VI.

Divers tableaux sur les États-Unis

Tableaux 187-190:

REVENU PERSONNEL – Le revenu personnel constitue le revenu courant reçu de toutes sources y compris les transferts du gouvernement et des entreprises, à l'exclusion des redistributions entre personnes. Sont classés comme personnes non seulement les individus (incluant les personnes à leur compte), mais aussi les associations à but non lucratif, les caisses de crédit, les caisses privées d'assurance santé et de bien-être social. Le revenu personnel est mesuré avant impôt par la somme des traitements et salaires, d'autres revenus du travail, revenu de biens immobiliers et de loyers, moins les intérêts et les dividendes et les paiements de transfert, moins les contributions personnelles à l'assurance sociale. *The National Income and Product Accounts of the United States, 1929-1985* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

Le concept de revenu personnel diffère légèrement entre le Canada et les Etats-Unis. Au Canada, les estimations des employeurs et des salariés aux caisses d'assurance sociale et aux régimes publics de pensions font partie du revenu personnel du côté des revenus, et elles sont considérées comme une partie des transferts courants aux administrations (impôts et taxes) du côté des dépenses de la catégorie des particuliers et entreprises individuelles. Aux Etats-Unis ces mêmes cotisations ne sont pas prises en compte dans le revenu personnel et ne figurent donc pas du côté des emplois dans le compte du revenu personnel et de son emploi. Ces différences de traitement influent sur les niveaux du revenu personnel pour les deux pays. Elles n'ont cependant aucune incidence sur les estimations du revenu disponible et de l'épargne nette des particuliers ou sur le rapport entre l'épargne personnelle et le revenu disponible. *Comptes nationaux des revenus et des dépenses*, Statistique Canada, nº de catalogue 13-549, p. 366.

REVENU PERSONNEL DISPONIBLE – Revenu personnel après déduction des taxes et des transfers courants au gouvernement. C'est le revenu personnel, disponible à l'épargne et à la consommation. *The National Income and Product Accounts of the United States, 1929-1985* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

DEPENSES PERSONNELLES A LA CONSOMMATION – Comprend la valeur courante des biens et services représentant les achats de particuliers et d'institutions sans but lucratif, ainsi que la valeur des aliments, vêtements, logement et services de financement qu'ils reçoivent sous forme du revenu en espèces. Comprend la location mais exclut les achats de

propriétés qui sont classées sous titre de biens-capitaux. *The National Income and Product Accounts of the United States, 1929-1965* (tableaux statistiques), *U.S. Department of Commerce*, p. viii.

SECTION VII.

Divers tableaux sur les pays de l'OCDE et le monde

Tableaux 191-219:

PRODUIT INTERIEUR BRUT – Le produit intérieur brut (PIB) mesure la valeur de la production à l'intérieur des limites géographiques du pays, sans égard au fait que les facteurs de production en question soient résidents ou non résidents. Le PNB vise à mesurer la production des résidents du pays seulement et laisse hors compte celle des facteurs de production étrangers.

TABLEAU 191: Il est à remarquer que les cours du change utilisés en vue de la conversion des devises des pays respectifs en dollars des Etats-Unis ne rendent pas nécessairement compte des relations sur le plan du pouvoir d'achat intérieur entre les devises de divers pays. De nombreux facteurs non reliés aux niveaux des prix intérieurs, dont les mouvements internationaux de capitaux et les revirements temporaires des soldes du compte courant suscités par les politiques de gestion de la demande ou par l'application de divers types de contrôles, peuvent influer sur les cours du change. De plus, dans la plupart des pays, la partie de la production qui est échangée sur les marchés internationaux ne représente qu'une petite, parfois une très petite partie du PNB, de sorte que le taux de change ne s'applique qu'à une partie seulement de l'ensemble de la production économique du pays.

CONSOMMATION FINALE PRIVEE – Suivant le Système de comptabilité nationale (S.C.N.) sont maintenant inclue dans ce poste certaines redevances (au titre des permis de conduire ou des passeports par exemple) acquittées par les institutions sans but lucratif au service des ménages, les paiements nominaux faits par les particuliers au titre de services rendus par les administrations publiques ainsi que la consommation de capital fixe, sous forme de machines et d'outillage, de certaines catégories d'institutions sans brut lucratif (partis politiques et clubs sportifs par exemple). Sont en revanche exclus de la consommation finale privée les paiements effectués par les ménages au titre de redevances et droits imposés par les administrations publiques pour se procurer des recettes, la consommation finale et les achats de machines et d'outillage des institutions sans but lucratif qui sont au service des ménages ou des administrations publiques et, ce qui est un élément important, les frais bancaires imputés aux ménages. *Comptes nationaux des pays de l'OCDE*, vol. II, p. 368, 1974.

CONVERSION FACTORS
